General Information about Dietetics:

What is Dietetics:

Dietetics is a health-related career that involves translating the sciences of **Nutrition** and **Food** to promote good health. Dietetics is a vital and growing field with many career possibilities.

What is a Registered Dietitian Nutritionist (RDN):

A Registered Dietitian Nutritionist (RDN) is THE food and nutrition expert. An RDN has specialized knowledge of the science of nutrition who has met the minimum academic and professional requirements to qualify for the credential "RDN."

Dietitian vs Nutritionist – What is the Difference?

A “nutritionist” may or may not be an RDN. The term “nutritionist” has no legal definition; therefore anyone can call themselves a nutritionist. On the other hand, all registered dietitian nutritionists are nutritionist. Starting in 2014, the Academy of Nutrition and Dietetics adopted the use of “registered dietitian nutritionist” (RDN) instead of “registered dietitian” (RD) to clarify this concept. Registered dietitian nutritionist (RDN) can only be used by dietetics practitioners who are currently authorized to use the credential by the Commission on Dietetic Registration of the Academy of Nutrition and Dietetics. These are legally protected titles. Individuals with these credentials have completed specific academic and supervised practice requirements, successfully completed a registration examination and maintained requirements for recertification.

What is a Licensed Dietitian?

Most states require that dietitians be licensed by a State Examining Board. In many states the requirements for licensure are the same as for Dietetic Registration. After passing the Registration Examination one would apply to the State Examining Board for licensure and pay the prescribed fee. At this time the state of Michigan does not have licensure.

How to Become a Registered Dietitian Nutritionist (RDN):

Registered Dietitian Nutritionists (RDNs) are food and nutrition experts who have met the following criteria to earn the RDN credential:

1. **Completed Master’s degree** at a US regionally accredited university or college and course work accredited or approved by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics.
2. **Completed an ACEND-accredited supervised practice program** at a health-care facility, community agency, or a foodservice corporation or combined with undergraduate or graduate studies. Typically, a practice program will run six to 12 months in length.

OR

A coordinated program that provides a Master’s Degree and Supervised Practice.

3. **Passed a national examination*** administered by the Commission on Dietetic Registration (CDR). For more information regarding the examination, refer to CDR’s website at www.cdrnet.org.
4. **Completed continuing professional educational requirements** to maintain registration.

BECOME AN RDN @ MADONNA UNIVERSITY

Registered Dietitian Nutritionist (RDNs) are
food and nutrition experts.

Pathway 1

**STEP 1. APPLY TO THE MU
UNDERGRADUATE PROGRAM IN
PRE-DIETETICS.**

**STEP 2. COMPLETE THE MU
DIETETICS PROGRAM AND BS
DEGREE REQUIREMENTS.**

**STEP 3. APPLY TO THE MU MASTERS OF
SCIENCE IN NUTRITION AND WELLNESS
PROGRAM AND THE DIETETICS GRADUATE
CERTIFICATE (INCLUDES SUPERVISED
PRACTICE).**

**STEP 4. COMPLETE THE MS AND
GRADUATE CERTIFICATE.**

STEP 5. PASS THE RDN EXAM.

KEEP IT GOING:

- Move to Active Membership in the Academy of Nutrition and Dietetics.
- Complete Continuing Education.
- Maintain Registration Status.
- Maintain Licensure Status, where appropriate.

BECOME AN RDN @ MADONNA UNIVERSITY

Registered Dietitian Nutritionist (RDNs) are
food and nutrition experts.

Pathway 2

**STEP 1. COMPLETE A
BACHELOR'S DEGREE.**

**STEP 2. APPLY TO THE MU
MASTERS OF SCIENCE IN
NUTRITION AND DIETETICS.**

**STEP 3. COMPLETE REQUIRED
PRE-REQUISITE COURSEWORK.**

**STEP 4. COMPLETE THE MS AND
A SUPERVISED PRACTICE
PROGRAM.**

STEP 5. PASS THE RDN EXAM.

KEEP IT GOING:

- Complete Continuing Education
- Maintain Registration Status
- Maintain Licensure Status, where appropriate

Employment Opportunities for RDNs:

RDs or RDNs work in a wide variety of settings, including health care, business and industry, community/public health, education, research, government agencies and private practice. Many work environments, particularly those in medical and health-care settings, require that an individual be credentialed as an RD or RDN.

Employment Settings:

1. **Hospitals, clinics or other health-care facilities**, educating patients about nutrition and administering medical nutrition therapy as part of the health-care team. They may also manage the foodservice operations in these settings, or schools, daycare centers or correctional facilities, overseeing everything from food purchasing and preparation to managing staff.
2. **Sports nutrition and**
3. **corporate wellness programs**, educating clients about the connection between food, fitness and health.
4. **Food and nutrition-related business and industries**, working in communications, consumer affairs, public relations, marketing, product development or consulting with chefs in restaurants and culinary schools.
5. Private practice, working under contract with healthcare or food companies, or in their own business. RDs or RDNs work with foodservice or restaurant managers, food vendors and distributors, athletes, nursing home residents or company employees.
6. **Community and public health settings**, teaching, monitoring and advising the public and helping improve quality of life through healthy eating habits.
7. **Universities and medical centers**, teaching physician's assistants, nurses, dietetics students, dentists and others about the sophisticated science of food and nutrition.
8. **Research areas** in food and pharmaceutical companies, universities and hospitals directing or conducting experiments to answer critical nutrition questions and find alternative foods or nutrition recommendations for the public.

Employment of dietitians is expected to increase 11% during 2020-2030 due to increased emphasis on disease prevention by improving health habits (Occupational Outlook Handbook). Median annual wages of full-time dietitians in the U.S. were \$72,000 in 2021 with the highest 10% earning more than \$114,000 (Academy of Nutrition and Dietetics, Compensation and Benefits Survey 2021). Wages were higher than average for RDNs who had been employed more than 5 years, who held advanced degrees or who worked in consultation and business, education and research, food management, pharmaceutical sales and outpatient clinics compared to inpatient care and government nutrition programs. Salaries vary with geographic location, years of practice and education level.

Madonna University Didactic Program in Dietetics:

Mission of the MU Department of Nutrition and Dietetics:

The Department of Nutrition and Dietetics aims to prepare students for nutrition-related careers with an emphasis on health and wellness. The programs offer a scientific, evidence-based education with the goal of graduating students who can think critically to address problems related to health, wellness, food, and nutrition.

Mission of the MU Undergraduate Nutrition and Dietetics Program:

The Mission of the Dietetics Program at Madonna University is to provide high quality curriculum that prepares graduates to perform successfully in supervised practice settings leading to eligibility for the CDR credentialing exam to become registered dietitian nutritionists. Graduates will be prepared to utilize their knowledge and skills in an articulate and assertive manner, in order to fulfill their pre-professional roles as interns and their professional roles in a variety of employment settings, while positively impacting the health and well-being of the clients and communities they serve.

The Mission of the Dietetics Program is consistent with the Mission of Madonna University to instill in its students' Christian humanistic values, intellectual inquiry, and a commitment to serving others through a liberal arts education integrated with career preparation and based on the truths and principles recognized within a Catholic tradition.

Goals of the MU Dietetics Program

The goals of the Madonna University Didactic Program in Dietetics are as follows:

Goal #1 - Madonna University Dietetics Program graduates will commit to community and professional service in the areas of food and nutrition.

Objective 1.1: 80% of students will participate in a minimum of 15 hours of community service or present a community nutrition education session by the end of the final semester as exhibited by their response on the senior exit survey.

Objective 1.2: 70% of students are active members in student/professional organizations by the time they graduate as exhibited by their response on the senior exit survey.

Objective 1.3: 75% of graduates that respond to a survey will report participating in volunteer or professional service within five years of graduation.

Objective 1.4: 50% of graduates that respond to an alumni survey will maintain membership in the Academy of Nutrition and Dietetics and Michigan Academy of Nutrition and Dietetics within 5 years of graduation.

Goal #2 - Madonna University Dietetic Program graduates will be prepared for the successful pursuit of further studies, supervised practice or entry level employment in a variety of settings.

Objective 2.1: 80% of program graduates apply for admission to a supervised practice program prior to or within 12 months of graduation.

Objective 2.2: 70% of program graduates are admitted to a supervised practice program prior to or within 12 months of graduation.

Objective 2.3: The program's one year pass rate (graduates who pass the registration exam within one year of first attempt) on the CDR credentialing exam for dietitian nutritionists is at least 80%.

Objective 2.4: Supervised practice directors responding to a survey will rate 75% of program graduates as well prepared for supervised practice.

Objective 2.5: At least 80% of program students complete program/degree requirements within three years (150% program length).

* The program continuously monitors progress and achievement of goals. Program outcomes data available upon request.

Other Undergraduate Nutrition Majors at MU

Three majors are available to students interested in food and nutrition at Madonna University: Dietetics, Nutrition & Wellness, and Nutritional Sciences. The Nutritional Sciences Major is designed for individuals who plan to go on to graduate, medical or dental school. The Nutrition & Wellness Major is designed for individuals interested in working in a fitness or health coaching field. For further information on the Nutrition & Wellness or Nutritional Sciences Majors, contact Ms. Laura Kull (lkull@madonna.edu).

Applying to the Undergraduate Dietetics Major at Madonna University?

Admission to the Dietetics Program is a **two-step** process. Students must first meet the requirements to declare pre-dietetics and then apply for admissions to the Dietetics Program.

Declaring a Pre-Dietetics Pathway: If a student transfers to Madonna University with 74 semester hours or less of college credit, he or she may simply declare pre-dietetics. If a student transfers to Madonna University with **over 74 semester hours of college credit**, he or she must meet the following requirements:

To be admitted with the intent to pursue the pre-dietetics path, transfer students with over 74 semester hours completed at other institutions and post-degree students must have a cumulative G.P.A. of at least 3.0, have completed at least 2/3 of all course work attempted, and be in good academic and personal standing at prior institutions.

Admissions to the Dietetics Program: When students have completed at least 56 semester hours and all of the “critical 6” courses, they may apply to the Dietetics Program by filling out an application and submitting it to the Program Director. Application forms are available in room 217 of the Franciscan Center or can be sent through e-mail by contacting Dr. Karen Schmitz or Ms. Laura Kull. You may submit an application during the term that you are completing your final critical 6 course(s). Write “in progress” next to the course on the application.

Deadlines: July 1st for the fall semester; November 1st for the winter semester.

Admission Requirements:

1. **Students with at least a 3.0 overall G.P.A.***
2. **AND a 3.0 critical 6 G.P.A.****
3. **AND no more than two grades below C (2.0) in any support course.**

*The overall G.P.A. will be calculated by adding all grades **from all colleges/universities attended** and dividing by the number of semester hours attempted (whether or not they transfer to MU).

**The critical 6 G.P.A. will be calculated by adding all grades from the equivalent of the following courses and dividing by the number of semester hours.

The “Critical Six”:

NFS 2270 Human Nutrition
WRT 1010 College Composition 1
WRT 1020 College Composition 2
BIO 2250 Human Physiology
BIO 2270 Microbiology
CHM 1610 Life Chemistry (with lab)

Students who are not accepted into the dietetics program can declare a major in Nutrition and Wellness major without any separate applications process. They would need to submit a change of major form to the registrar.

Academic Excellence Policy: Students must earn grades of C or higher in all dietetics and required support courses. A student, who has received two grades below C (2.0) in any major or major support course, will automatically be dismissed from the program. The original grade below C (2.0) counts in relation to this policy even if the course has been repeated for a satisfactory grade.

Completion of Degree and Verification Statement

The University requires a minimum of 120 semester hour credits to obtain a Bachelor's degree. The Dietetics Program consists of a minimum of 36 semester hour credits in major courses, and additional work in the natural sciences, social sciences and business. The program is based on the Core Knowledge Requirement of the Accreditation Council for Education in Nutrition and Dietetics (ACEND). Students are encouraged to complete a Minor to reach their 120 sh requirement. There are a number of appropriate minors on campus: including Exercise Sport Science, Business Administration, Marketing, Writing, Journalism and Public Relations, and Gerontology. Upon successful completion of the curriculum requirements, a Bachelor of Science Degree (B.S.) in Dietetics and a Verification Statement are granted. **Students must apply for graduation through the Registrar's Office two semesters before the anticipated graduation date. An "Intent to Graduate" form is obtained from the registrar and reviewed with the advisor.** This form must be filed whether or not the student plans on walking in the graduation ceremony. The Nutrition and Dietetics Program Director will issue a verification statement to students upon conferred graduation with a B.S. degree in Dietetics as posted by the Madonna University registrar.

Post Degree Students:

If I have a B.S. (from a University in the U.S.) in another subject, do I need a second Bachelor's Degree from Madonna University to become registered as a dietitian? No. Due to the Master's requirement to become and RDN it is recommended that post-degree students apply for the MS in Nutrition and Dietetics in the Graduate School at MU. Go to the Graduate Admissions section of the MU website for more information. Dr. Karen Schmitz is the Director of the Graduate Programs in Nutrition and Dietetics.

What if I have an MS in a different subject? If you have a degree from an American regionally-accredited university then you need only to complete the courses listed below plus any major courses and major support courses that were not successfully completed with the first Bachelor's Degree and earn a grade of C or higher in all major and major support courses. To enter the Dietetics Program as a post-degree student, you need to meet admissions requirements for the pre-dietetics path, then apply and be accepted through the same process as the degree bound students (see the section on "How do I become a Dietetics Major?" above). Most successful post-degree students maintain a GPA of 3.3 or higher **a minimum of 15 semester hours of 3000 and 4000 level NFS classes must be completed at Madonna University to obtain a Verification Statement signed by the Program Director. NFS 3220 Nutrition Assessment, NFS 3250 Medical Nutrition Therapy I and NFS 4420 Medical Nutrition Therapy II and Professional Issues are required as part of the 15 semester hours.** The equivalent of NFS 4260 Nutrient Metabolism must be no more than five years old to be accepted. The Verification Statement is required to enter a Dietetic Internship. The University requires a minimum of 30 semester hours to be completed at Madonna University if a student wishes to obtain a second bachelor's degree. However, students may be required to complete more hours than the minimums to fulfill Dietetic Program requirements and the Religion general education requirement. The number of credits required will depend on course work completed with the initial degree. Your academic advisor can outline an individualized Plan of Study.

International Post-Degree Students:

If I have a degree from a foreign University, do I need a second Bachelor's Degree from Madonna University to become registered as a dietitian? Not always. International students are welcome at Madonna University. Recently, we have had students successfully complete the dietetics program who originally lived outside of the US. Students with degrees from institutions outside the U.S. must present documentation of the equivalence of their foreign degree(s).

If the student has the equivalent of a BS: Due to the Master's requirement to become an RDN it is recommended that International post-degree students apply for the MS in Nutrition and Dietetics in the Graduate School at MU. Go to the Graduate Admissions section of the MU website for more information. Dr. Karen Schmitz is the Director of the Graduate Programs in Nutrition and Dietetics.

If the student has the equivalent of an MS: They can complete the Verification Statement at the undergraduate level without completing a second BS. For this pathway the student must be accepted to the pre-dietetics pathway and then the Dietetics Program. Students with foreign degrees must complete the following courses (16 semester hours) as a minimum to obtain a Verification Statement signed by the Program Director:

NFS 3220 Nutrition Assessment
NFS 3250 Medical Nutrition Therapy I
NFS 4380 Public Health Nutrition
NFS 4460 Management of Food and Nutrition Services
NFS 3390 Nutrition Education and Counseling
NFS 4395 Advanced Nutrition Counseling
NFS 4420 Medical Nutrition Therapy II and Professional Issues

In addition, foreign students must complete any other major or major support courses that were not completed with the original degree(s). The equivalent of NFS 4260 must be less than 5 years old at the time of application to Madonna University. Note: WRT 1010 and WRT 1020 or equivalent must be completed to enter the Dietetics major.

Academic advising

The academic advisors for Dietetic Majors at Madonna University are:

Undergraduate

Laura Kull, MS, RDN, FAND
Office: 1502A, Main Bldg.
Phone: 734-432-5519
e-mail: lkull@madonna.edu

Graduate

Karen Schmitz, Ph.D., R.D.
Office: 217U, Franciscan Center
Phone: 734-432-5534
kschmitz@madonna.edu

Supervised Practice

Tina Miller, MS, RDN, FAND
Office: 217, Franciscan Center
Phone: 734-432-5519
cmiller@madonna.edu

Students should schedule an initial appointment before scheduling classes for the first time, and one advising appointment each semester prior to enrolling for classes. Self-advising is not recommended for this major.

The advisor can provide assistance with:

- Planning and scheduling of required courses
- Providing information about scholarships, professional organizations, job openings, volunteer opportunities, internships
- Making plans for internships or future career endeavors
- Communicating pre-professional and professional goals and expectations

If your advisor is unavailable, contact the Student Advising and Success office at: 734-432-5417.

Current Accreditation Status of MU Didactic Program in Dietetics

The Didactic Program in Dietetics (DPD) at Madonna University has been accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics and is listed in the "Directory of Dietetic Programs, The Academy of Nutrition and Dietetics." The most recent was received in 2020.

For information on the accreditation status of the Madonna University Didactic Program in Dietetics, contact:

The Accreditation Council for Education in Nutrition and Dietetics
The Academy of Nutrition and Dietetics
120 South Riverside Plaza, Suite 2190
Chicago, IL 60606
312/899-5400
ACEND@eatright.org
www.eatrightpro.org/acend

The Dietetics Curriculum

Curriculum Requirements: (See Appendix A for a sample Plan of Study)

Madonna University's Dietetics curriculum has been designed to cover the general education requirements of MU and the Foundation Knowledge and Learning Outcomes for an ACEND Didactic Program. Graduates of the Madonna University Didactic Program meet the knowledge requirements for the post-baccalaureate internship. The curriculum focuses on the basic disciplines of food science, food service, nutrition, medical nutrition therapy and management. For a B.S. degree in Dietetics, 120 total hours are required with 36 of those hours in major courses and 26 hours in support courses.

Planned maximum completion timeframe for the program is three years once admitted to the Dietetics major. The curriculum has been designed so that students meet prerequisite requirements and avoid course conflicts in their schedules. Individual Plans of Study (POS) are designed by the advisor to help students meet their academic goals. However, courses are required from a variety of departments and conflicts may occur. **It is the student's responsibility to double check pre-requisite requirements, time conflicts and completion of all major requirements.** Call or see your academic advisor as soon as any scheduling problems are detected. Required major and support courses for the Dietetics Major are listed below.

Major Courses

NFS 2260 Food Science and Sanitation
NFS 2270 Human Nutrition
NFS 3120 Nutrition and Human Development
NFS 3220 Nutrition Assessment
NFS 3250 Medical Nutrition Therapy I

NFS 3390 Nutrition Education and Counseling
NFS 4260 Nutrient Metabolism
NFS 4380 Public Health Nutrition
NFS 4395 Advanced Nutrition Counseling
NFS 4420 Medical Nutrition Therapy II and Professional Issues
NFS 4460 Mgt of Food and Nutrition Services
NFS 4960 Experimental Food and Research

Support Courses

BIO 2250 Human Physiology
BIO 2270 Microbiology for Health Sciences
CHM 1110 General Chemistry
CHM 1110 General Chemistry Lab
CHM 1610 Life Chemistry
CHM 1610 Life Chemistry Lab
CHM 3610 Biochemistry I
MGT 2360 Principles of Management
MTH 2350 Probability and Statistics
SOC 1020, PSY 1010, or SW

Major Electives: Students can choose from any NFS courses not required as major courses EXCEPT NFS 2380 and NFS 2220. Five semester hours are needed for a B.S. degree. Major elective courses include:

NFS 2230 Therapeutic Nutrition for the Health Professional
NFS 2290 Nutrition Topics – topics vary each term, student can take 3 different topics
NFS 3290 Nutrition Topics - topics vary each term, student can take 3 different topics
NFS 3311 Sustainable Food Systems and Nutrition
NFS 2470 Sports Nutrition
NFS 2420 Nutrition for the Older Adult

Recency of courses: The following coursework must be less than 5 years old (as of the date of the most recent admission to Madonna University) to count toward receiving the B.S. in Dietetics or the verification statement: NFS 3220 Nutrition Assessment, NFS 3250 Medical Nutrition Therapy I, NFS 4420 Medical Nutrition Therapy II and Professional Issues, NFS 4260 Nutrient Metabolism, and NFS 4460 Management of Food and Nutrition Services.

Portfolio Requirement

All students majoring in Dietetics are encouraged to develop an e-portfolio to be used to showcase their undergraduate work. You may choose to save major course work that illustrates your undergraduate accomplishments. You may also save evidence of awards, scholarships, honor society membership, work in the dietetics field, service learning, or involvement in Nutrition Network activities.

Assistance with writing, tutoring, computers

There are several programs at Madonna University designed to help students with academic needs.

- The Center for Personalized Instruction offers tutoring to any Madonna student. There is no charge for tutoring. 734-432-5599, CPI@madonna.edu or madonna.mywconline.com.
- The Writing Center helps with any writing assignments. There is no charge, simply stop by room 2300 (734-432-5304) to schedule an appointment go to madonna.mywconline.com
- Technology Learning Services provides a help desk you can access by phone (734-432-5800) or on-line (helpdesk@madonna.edu) for assistance with on-line courses or general computer questions.

Psychological Services

Counseling services are available for students with Ulliance Life Advisor Consulting. For assistance, call 1-855-774-4700.

What other policies and procedures should I be aware of?

Students are encouraged to read the Undergraduate bulletin available online at <https://www.madonna.edu/resources/registrar/academic-planning-guides-catalogs/> for details on tuition and fees, graduation requirements and grievance procedures.

- **Grievance procedures:**

Student appeal procedures are found in the Student Handbook available in the “MyPortal” system, under Student Resources. If a grievance is related to program non-compliance students may file a complaint with ACEND. Go to <https://www.eatrightpro.org/acend/public-notice-and-announcements/filing-a-complaint-with-acend> for details.

- **Prior Learning Program**

The Prior Learning Evaluation Process is described in detail in the Undergraduate Catalog. The student must first meet with an academic advisor to develop a plan of study. If prior learning credit is a possibility within the context of the plan, an evaluator can determine if and how much credit can be given.

- **Formal evaluations of students and regular reports of performance and progress at specified intervals throughout the program:**

The students receive formal evaluations (grades) at the end of each term, as listed in the Academic Schedule/Calendar (Undergraduate Catalog). Grade interpretation is outlined in the same section of the Catalog. Grades are based on the objectives and requirements outlined in each course syllabus.

- **Retention and Remediation**

The Early Alert System gives instructors an opportunity to report students at risk of failing a course. Students that are reported are contacted by the Office of Student Services and advised of their status and given resources for improvement based on their individual circumstances. The Office of Student Services, the instructor and the student discuss reasons for the poor grades and strategies for improved performance. Students may be referred to the Counseling and Disability Resources Center that offers academic skills workshops and other support services or the Center for Personalized Instruction that provides tutoring.

- **Distance Education Policies and Procedures**

Students enrolled in distance education courses at MU will utilize the BlackBoard Learning Management System. This service is provided for the student with no additional cost. To maintain privacy the student is given a username and password to access their courses. The passwords must be updated monthly and utilizes two-factor identification. Both Respondus Lockdown Browser and Monitor may be used to verify the identity of the student taking the exam. The computer labs on campus have all equipment needed for this process, or the student can simply download the software from the BlackBoard Learning Management System. More information see the Electronic Communication Policy in the Undergraduate Student Handbook.

Information about Supervised Practice Programs

Once the BS in Dietetics (and/or Verification Statement) is complete, students must complete both a Master's Degree and an ACEND Accredited Supervised Practice (SP) program. The SP programs include a minimum of 1,000 hours of supervised practice in a variety of settings; hospitals, food service facilities, outpatient clinical sites and community settings. Program graduates can apply to any ACEND accredited internship program in the U.S., but if you need to remain in the Detroit area you have the following options:

1. Dietetic Internship + Master's Degree in any discipline.
MS in NW from MU + Unaffiliated SP Programs in the Detroit area: Beaumont Hospital, Henry Ford Hospital, Detroit Medical Center, or University of Michigan.
2. Graduate level Coordinated Programs in Dietetics.
Madonna University, Grand Valley State University, and Eastern Michigan.
3. Future Education Model Graduate Program.

Further information can be found in the Accredited Programs Directory:

<https://www.eatrightpro.org/acend/accredited-programs/accredited-programs-directory>

The Internship Application Process:

The Department offers a general meeting in the fall and winter semesters for all students who plan to apply for Supervised Practice outside of MU. Notification of the fall meeting date and time is sent by letter to all declared Pre-Dietetics and Dietetics Majors during the previous summer. Information is posted on the Nutrition Network Blackboard site, also. Attendance is strongly encouraged. All Supervised Practice application materials are available on line through DICAS. Visit individual websites for specific program information. Don't worry about calculating your G.P.A., the DICAS website will do that for you.

In general, the student's responsibilities in the process include:

1. Learning how to navigate the DICAS system
(<https://www.eatrightpro.org/acend/students-and-advancing-education/dietetic-internship-match-students>) .
2. Obtaining specific information from internship websites.
3. Completing computer matching forms on-line at www.dnddigital.com
4. Sending an official transcript from each college or university attended to DICAS.
5. Defining immediate and long-term goals
6. Developing a brief explanation of how your interest in nutrition began, how it developed into a career choice, how it was affected by college courses and how your commitment to it was demonstrated through voluntary and paid experiences in the dietetics field
7. Requesting 3 letters of recommendation from professors and work supervisors
8. Meeting with the Director of Nutrition and Dietetics to review any documents and double check that you have completed the entire process.

Application Deadlines:

| | May/July graduates: | December graduates: |
|----------------------|---------------------------|---------------------|
| Application Deadline | February | September |
| Appointment Date | April | November |
| Internship starts | July, August or September | January or February |

Applications may be submitted before graduation if the student will have completed the program by the internship starting date.

The Computer Matching Process

Students applying for internships apply on-line through the DICAS process and register on-line for computer matching with D&D Digital at www.dnndigital.com by the application deadline. Students rank the internships they have applied to by their first choice, second choice, etc. On appointment day, students can check the website to find out if they have matched with an internship. If a student has a match, he or she must contact the internship to accept or decline the position. Students receive more information on the DICAS and matching processes at the fall/winter internship meeting and in NFS 2000.

The Directory of Dietetic Programs issued each year lists all of the Internships and Coordinated Undergraduate Programs currently accredited by the ACEND. Each listing provides the name, web address, phone and e-mail of the Program Director so that you can contact the program for more information. This directory is located at <https://www.eatrightpro.org/acend#students-and-advancing-education>.

Internship Cost

Costs vary widely, so a student should check with each program about required expenses. Some internships give stipends, some charge no tuition, and others may charge several thousand dollars in tuition. Some accredited internships qualify for government sponsored loan programs. Students should check the websites of the individual programs for financial information.

How do I Become Competitive for a Supervised Practice Program?

Although a student has no guarantee of receiving a Supervised Practice (SP) Program appointment, there are several areas that a student can work on to be more competitive for an appointment. Ask yourself, “What can I do to stand out?” instead of aiming for the minimum requirements.

1. **Grades: 3.3 GPA overall** (higher for food and nutrition courses). Many internships have a minimum of a 3.0 GPA to submit an application, but that does not guarantee a spot. Many internships look for strong grades in Medical Nutrition Therapy and the sciences.
2. **Nutrition-Related Work Experience: Paid and/or volunteer.** The more experience the better. Aim for 200 hours. Hospital work is considered the best initial experience. Other experiences include college food service, nursing home food service, culinary experience, camp food service, community nutrition programs (WIC, EFNEP, community gardens), and working with dietitians in private practice.
3. **Leadership:** Get involved in extra-curricular activities including, College/University clubs (i.e. Nutrition Network), student government, sports, community service projects. Run for a leadership position. Present research at a professional meeting.
4. **Involvement in local Dietetic Associations** (i.e. Southeastern Michigan Dietetic Assoc.). Contact SEMDA leaders and ask about volunteer positions.
5. **Honor Societies, Scholarships, Awards:** MU Science and Mathematics Honor Society – Sigma Zeta is awarded each spring. Applications available in January.
6. **Applying to several internships.**
7. **Personal Statement:** The importance of this statement cannot be stressed enough. Read the directions from each internship in regards to this letter very carefully. This letter is your chance to describe your goals, strengths and weaknesses. In some internships, this letter plays a large role in who is actually chosen. Do not hesitate to ask any of the Dietetics faculty for assistance polishing your statement.
8. **Professionalism:** Work hard academically and in the work place. Show respect for peers, professors and supervisors. You will need three strong letters of recommendation for the internship and for employment. If you have a problem with a professor or supervisor, approach the person in a professional manner and focus on the problem you are trying to solve. If you would like a professor or supervisor to write a letter of recommendation, ask them. Do not assume they will do it. If the person agrees to write the letter, supply the person with information on your accomplishments to make the letter the best it can be. Recommendation information forms are available from your academic advisor.

Can I wait and apply for an internship years after graduation or program completion?

SP Programs can make their own guidelines for recency of education, so you would need to check their website to find their “Recency of Education Policy.” In general, most programs do not make you re-take coursework if the verification statement is less than 5 years old. Once the verification statement is five years old, many programs will ask you to complete new coursework in medical nutrition therapy and other advanced nutrition courses. Some may even ask you to repeat biochemistry or physiology.

What Do You Do if You Don't Receive an Appointment?

Although Madonna University students, who maintain a 3.3 GPA or above, have high placement rates into internship positions, internship appointments are highly competitive. If an appointment is not received, credentials should be re-examined. Develop a plan to emphasize your strengths and compensate for, or minimize your weaknesses. You may call the Internship Director(s) and ask how you can improve your chances for a future appointment.

Students should contact their advisor to discuss future plans. Consider the following:

- Evaluate how you can improve your qualifications
- Look at additional internship or coordinated programs
- Reapply
- Obtain a job in a dietary related field
- Contact career services for help with resume writing and interviewing
- Take the NDTR exam (see information in the following sections)

As of June 1, 2009, students who complete a Didactic Program in Dietetics (DPD) and a bachelor's degree are eligible to take a registration examination and become Nutrition and Dietetic Technicians, Registered (NDTRs). This route may be of particular interest to students who do not enter a dietetic internship program but do want to work in nutrition. General information and relevant links are found at <http://cdrnet.org/program-director/grad-info-dpd-pathway-iii>

Please review information on these web links thoroughly while considering the NDTR option and follow application instructions carefully.

If I am interested in the NDTR option, instead of the RDN pathway, what do I need to do?

The process is started by your DPD Program Director. Once your application and documents are entered by your Program Director you will receive instructions directly from CDR to sign up for the test.

Follow these steps to get started:

1. Go to the Commission on Dietetics Registration's (CDR) website to learn more about the NDTR. <https://www.cdrnet.org/certifications/dietetic-technician-registered-dtr-certification>
2. Print out the Student Instructions document. It is important that you follow the instructions carefully.
3. Print out and complete the NDTRE Misuse Form and the Transcript Release Form (both attached). **Return these forms to your program director.** Your application for the exam cannot be processed without these forms.
4. Your Verification Forms will be emailed to you directly. The Program Director will provide a copy for the NDTR exam application.
5. Once all of your document is provided your Program Director will enter you into the Registration Eligibility Processing System (REPS). You will then receive an email requesting that you complete the online form for additional demographic information. It is imperative that you follow the instructions in this email and complete the required profile information as soon as possible. ***Until you have completed this step, you will NOT be processed for registration eligibility, nor will you be able to schedule your examination.***
6. After approval from CDR you will receive an Authorization to Test email from Pearson VUE. Follow directions provided by Pearson VUE to complete the process and sign up for a test date.

What about Graduate School?

Students who complete the undergraduate dietetics degree at Madonna University are well prepared to enter graduate study in a variety of areas. Students considering graduate school or professional study in any field will need to have a good GPA (minimums vary from program to program) and solid performance on the Graduate Record Exam (GRE) or other required entrance exam.

Graduate study in general: What is it all about?

Graduate school offers challenges well above and beyond the undergraduate degree to prepare students as independent thinkers. Coursework builds upon what students have learned in their undergraduate studies. Master's level programs may also offer thesis and non-thesis alternatives. A thesis entails conducting a research study under the direction of a faculty member in their area of expertise, analyzing the data, and presenting findings to a committee composed of select faculty members. If you plan to pursue a doctoral degree at some point, selecting the thesis option is imperative as doctoral work involves building greater independence as a researcher. Consequently, when considering graduate programs, it is important to closely examine the research conducted by the faculty.

Graduate programs may also offer a non-thesis option. This generally entails completion of coursework plus a lengthy comprehensive exam to test ability to integrate knowledge in several areas of nutrition plus a culminating experience. The culminating experience can include many types of work under the direction of a faculty advisor such as a research project, an educational intervention project with a specific population, or many other alternatives. Students considering graduate study should investigate these options thoroughly prior to applying to a program, again, to ensure a good fit between student interests and program offerings.

Graduate study in nutrition. Graduate study in nutrition varies greatly from institution to institution. Areas of focus may be public health nutrition, basic sciences, international nutrition, clinical nutrition, etc. At MU, we have two MS programs in Nutrition:

1. MS in Nutrition and Dietetics
2. MS in Nutrition and Wellness (for students that do have a Verification Statement)

Contact Dr. Karen Schmitz for details. kschmitz@maddona.edu

Graduate study in other fields. A number of other fields can complement the study of nutrition. Therefore, individuals may wish to consider an area of study that provides a broader base of preparation for their chosen career pursuits. Some examples of potential complementary areas include food science, business, psychology, counseling, biochemistry, and exercise science.

How Do I Apply to Take the Registration Examination?

As you come to the end of your SP program you need to start thinking about applying for the Registration Examination. SP program personnel may give you more information on this process. You cannot take the Registration Examination until you have successfully completed a SP program and a Master's Degree in any discipline. The Registration Examination is available on computer through learning centers across the U.S. A review course or purchase of practice questions is highly recommended. Study guides are available with practice questions through The Academy of Nutrition and Dietetics.

Other sources of practice questions include:

- The On-line Professional Skills review (www.eatright.org)
- DietitianExam.com
- Visualveggies.com

Upon successful completion of the exam, you are a Registered Dietitian Nutritionist (RDN).

Assistance with the Job Search after Graduation from Madonna University:

The office of Career Development at Madonna University (734-432-5623 or careerdevelopment@madonna.edu) offers assistance with resume writing and job placement for Madonna University students and alumni. The MU has partnered with Handshake to provide job and oncampus student employment. <https://www.madonna.edu/resources/career-development/> . Nutrition-related employment advertisements can be found in magazines such as Today's Dietitian or on web sites such as www.semda.org and www.eatrightmich.org. Recruiters for nutrition and food service jobs might be helpful in finding that first job. The Academy of Nutrition and Dietetics offers Eatright Careers for employment needs. <https://eatright.nationalhealthcarecareers.com/> .

Organizations and Scholarships

The Academy of Nutrition and Dietetics

www.eatright.org

The Academy of Nutrition and Dietetics is the world's largest professional organization for dietitians. As a student enrolled in a dietetic program in an accredited university, but not yet eligible for active membership, you have the opportunity to become an associate member of the organization. Benefits of membership include:

- Subscription to The Journal of the Academy of Nutrition and Dietetics
- Subscription to Food and Nutrition Magazine (bi-monthly publication on nutrition issues)
- Subscriptions to the Daily News E-Mail and the EatRight Weekly E-mail with updates on National nutrition headlines
- Continuing education programs and materials
- Professional publications
- Member discounts on publications and materials
- Information on and lower fees for the Annual Meeting
- Information on and access to Dietetic Practice Groups
- Automatic membership in the Michigan Academy of Nutrition and Dietetics
- Job announcements
- E-Mentoring Program
- Access to the Evidence Analysis Library

By far the most important advantages as an associate member are the Journals, networking and the chance to improve your marketability. Scholarships for senior students from the Michigan Nutrition and Dietetics Institute require that students are members of the Academy. As of 2023, the student membership fee is \$58.00. Applications can be found on the bulletin board in Room 1502 or go to the website: <https://www.eatrightpro.org/membership/membership-types-and-criteria/student-member> . The Dietetics faculty strongly urge you to be an associate member of the Academy. Internship directors look favorably on involvement in dietetic associations.

The Michigan Academy of Nutrition and Dietetics

www.eatrightmich.org

The Michigan Academy of Nutrition and dietetics is Michigan's professional organization for dietitians. Students who are Academy associate members are automatically members of the state association. Some of the advantages include:

- < Newsletters and publications
- < Information on and lower fees for the Annual Meeting
- < Access to Dietetic Practice Groups
- < A forum to present research at the annual conference
- < Scholarships for juniors and seniors applying for internships
- < Networking and more...

By becoming a Michigan Academy member, you can improve your marketability and get to know dietitians in your area of interest. The Michigan Nutrition and Dietetics Institute awards scholarships on an annual basis to juniors and seniors in didactic programs and to dietetic interns. Scholarship forms need to be submitted in January and scholarships are awarded in the spring at the annual conference. The dietetics faculty members strongly encourage students to attend at least one Michigan Academy Annual Conference to learn more about current topics in nutrition. For more information, see the Michigan Academy web site www.eatrightmich.org

The Southeastern Michigan Dietetic Association (SEMDA)

www.semda.org

Only Academy and Academy affiliate members are eligible for membership in local dietetic associations. These organizations provide students with the opportunities to attend local professional meetings, hear speakers, and interact with dietitians on a local level. Any involvement in local dietetic association activities is looked at favorably on internship applications. The membership fees for students are nominal. For more information on topics, dates and locations, see the Bulletin Board in Room 1502 or go to the SEMDA web site at www.SEMDA.org.

Dietetic Practice Groups (DPGs)

Student members of the Academy of Nutrition and Dietetics can join Dietetic Practice Groups. DPGs are specialized practice groups which enable members to improve their job performance, gain insight into specialized areas of food and nutrition and network with colleagues. DPGs cover a wide variety of practice topics including: Hunger and Environmental Nutrition (www.hendpg.org), Diabetes Care and Education (DCE) and Sports Nutrition. Go to www.eatright.org for more information.

Member Interest Groups (MIGs)

Member groups represent the many characteristics of the Academy's membership and the public it serves, and are based on common interests, lifestyles and backgrounds. Go to www.eatright.org for more information.

NOBIDAN is an organization of African-American Dietetic and Nutrition Practitioners whose mission is to develop an innovative plan with futuristic vision and ideals that will reflect concern for the health status of the public and facilitate professional enhancement for its members. Members of the Michigan Chapter would like to serve as mentors for African-American students.

The Nutrition Network

The Nutrition Network is the official club of dietetic and nutrition & food science students at Madonna University. Meetings are held once a month during the fall and winter terms. Meeting days and times vary from semester to semester and are held in the Food Science Lab (Room 1502). Activities include guest speakers, field trips, volunteer opportunities and involvement in health promotion activities. For meeting information see the Nutrition Network Bulletin Board in the hall outside room 1502. As a Nutrition Network member, you will receive e-mail updates and access to the Nutrition Network Blackboard site. For more information contact Ms. Laura Kull at lkull@madonna.edu.

Sigma Zeta Honorary Society

Junior or senior level students who maintain a high GPA overall (3.0) and in the science, math and upper level NFS courses (3.0) can be nominated for membership in Sigma Zeta, an honor society for science and mathematics majors. The benefits of joining the society include recognition for your achievements, boosting your resume or internship application, networking and an opportunity to become an officer and develop your leadership skills. If you feel that you might meet the GPA requirements and you have completed 15 semester hours in science, math or upper level NFS courses at Madonna University you may apply for Sigma Zeta. Your application will be reviewed and you will be notified as to whether you qualify. Applications must be picked up, completed and returned to the College of Science and Mathematics in room 217 of the Franciscan Center.

Scholarships

As a student at Madonna University and a pre-dietetics/dietetics major there are numerous scholarship opportunities available to you. The Undergraduate Bulletin lists financial aid and scholarship information. Madonna University scholarship applications are due by March each academic year. More information on these scholarships can be obtained from the Madonna University Financial Aid Office (734) 432-5663 and the Madonna University Student Financial Aid Handbook.

Other scholarships are available specifically for junior and senior dietetics majors at ACEND accredited institutions. When information on these scholarships becomes available, it is announced in NFS courses and the information is put on the Nutrition Network Blackboard Course. Application requirements and deadlines vary for each scholarship. For more information on The Academy, The Michigan Academy and SEMDA scholarships, visit their respective web sites.

Research

Students conduct original research as part of NFS 4960 Experimental Food and Research during the fall term. The students with the highest scores on the research project are invited to present research posters at the Madonna University Research Symposium and at the Michigan Academy Annual Conference in the spring. In 2012 dietetics majors took first and third place at the Madonna University Research Day. In 2011, a dietetics major won first place at the Madonna University Research Day and Madonna University student researchers took first and third place at the Michigan Academy Annual Conference.

Student Support Resources

Madonna University provides many student resources, some highlights below.

For more details go to www.madonna.edu/resources

CENTER FOR PERSONALIZED INSTRUCTION/TRIO <https://www.madonna.edu/resources/cpi/>

Phone: 734-432-5599 E-mail: cpi@madonna.edu. Located in the MU Library.

Tutoring is free and available Virtual or In-Person

FREE Academic Skills workshops and resources

FREE drop-in Math Lab

FREE Supplemental Instruction (SI), group study sessions, in certain science and nursing courses

TRIO Program-a federal academic program available to eligible students

WRITING CENTER <https://www.madonna.edu/resources/writing-center/>

Phone: 734-432-5304 E-mail: writingcenter@madonna.edu

Offers free services for writers who want to work one-to-one with a writing tutor

Offers tutoring for writing assignments in any discipline

Offers individual appointments with a tutor (1/2 hour for a short paper, one hour for long papers) and drop-in tutoring during posted hours

Provides tutoring online via zoom

CAREER Development <https://www.madonna.edu/resources/career-development/>

Suite #1411 Phone: 734-432-5623 E-mail: careerservices@madonna.edu

Career Services provides assistance to students seeking Cooperative Education/Internship experiences, part-time or full-time employment, on-campus student employment, career development resources, and career counseling. Students are invited to participate in job fairs, on-campus recruiting, and workshops in resume writing, job-search techniques, and interviewing.

TRANSITIONS Center <https://www.madonna.edu/resources/transition-center/>

Room #1404

Phone: 734-432-5740 E-mail: transitioncenter@madonna.edu

Office Hours: By appointment

Military benefits, Adult and Transfer student orientation

Technology Services <https://www.madonna.edu/resources/technology-services/>

Computer Labs/Helpdesk

Phone: 734-432-5800 E-mail: helpdesk@madonna.edu

Title IX

Application for Admissions into the ACEND-Accredited
Madonna University Didactic Program in Dietetics

Admissions Process: Students seeking admission to the Dietetics Program must meet the following requirements (see Undergraduate Catalog for more details):

1. A minimum of 56 semester hours, completed at or successfully transferred to Madonna University, with a cumulative grade point average of 3.0 or higher overall for ALL Madonna and other college level coursework, regardless of whether classes transferred to Madonna University.
 2. Successful completion of the equivalent of all of the following courses—NFS 2270, Human Nutrition; WRT 1010; WRT 1020 or Communications course; BIO 2250, Human Physiology; BIO 2260 or 2270, Microbiology; and CHM 2210, Organic Chemistry—with a cumulative grade point average of 3.0 or higher over these six courses.
-

Directions:

1. Complete this form and submit to the Director of the Dietetics Program, Room S217 Franciscan Center, Madonna University, 36600 Schoolcraft Rd., Livonia, MI. You must submit this form; information will not be accepted in any other format.
2. Official transcripts from **ALL** colleges or universities attended must be on file with Madonna University or can be mailed directly from the institution to the Program Director. Students with foreign transcripts must have an evaluation sent from the foreign transcript evaluation service to the Program Director.

Deadlines:

July 1st for fall admissions
November 1st for winter admissions
May 1st for spring admissions

**Application for Admissions into the ACEND Accredited
Madonna University Didactic Program in Dietetics**

Name (First, Middle, Last) _____

Maiden Name: _____ MU Student ID #: _____

Phone #: _____ MU E-mail _____
